

Loft & Roof Space Insulation

Overview

Sustain's loft insulation aims to reduce the 25% of heat lost from building roofing.

Application

Intended for loft and roof space fitting including:

- The whole of the roof space/suspended ceiling areas
- All water tanks contained in the roof space
- All pipe work within the roof space
- Permanent insulation of access hatch
- Adequate draught proofing of access hatch

Specification

- Guaranteed Ozone Depletion Potential (ODP) of zero
- Thickness of up to industry standard 300mm

Standards

All our loft insulation is compliant with:

- BS 5803: Part 1, 2, 3, and in accordance with Part 5 and BS 5422: 2001.
- BS EN 13162:2001 Thermal insulation products for buildings - Factory made mineral wool products.

Benefits

- Low environmental impact
- 25 year guarantee
- Payback period of 5 years
- Full project management of installation
- 'Fit and forget' installation

Our Service

- Free non-disruptive survey of your buildings
- Full energy report with detailed costs, savings and payback times
- Full project management of installation
